

EDUCATION

MIT Academy of Engineering, Pune

2024 - 2028

B.Tech. - Computer Engineering | CGPA: 8.56 / 10

JD junior college, Parbhani, Parbhani

2024

12th | HSC | Percentage: 75.30 / 100

Bal Vidhya Mandir Highschool, Parbhani

2021

10th | MSBSHSE | Percentage: 98.80 / 100

INTERNSHIPS

Preskilet PVT LTD | E-Learning / Edtech

11 Jun, 2025 - 11 Aug, 2025

AI & Software Intern

Key Skills: Figma | Email Marketing | AI model training and data annotation workflows | UI Development | AI | JSON

Completed a 2-month internship as an AI & Software Intern at Preskilet Pvt. Ltd. (11 June 2025 – 11 August 2025), where I contributed to AI model development and product prototyping initiatives.

Key Responsibilities & Contributions:

1. Developed and trained a Facial Video Detection AI model through dataset annotation, refinement, and performance optimization.
2. Worked extensively with JSON data structures and APIs for AI model integration.
3. Designed and prototyped web pages in Figma to test and validate upcoming product features.
4. Assisted in user onboarding and conducted outreach to gather feedback for product improvement.
5. Handled Query Resolution Management (QRM) to resolve real user issues and enhance user experience.

Skills Gained:

1. AI model training and data annotation workflows
2. Software prototyping and UI/UX design thinking
3. API data handling using JSON
4. Startup product development lifecycle exposure
5. Professional communication and collaborative teamwork

This internship provided hands-on exposure to AI development, software prototyping, and real-world product enhancement within a startup environment.

Cisco Networking Academy | IT / Computers - Software

01 Jun, 2025 - 01 Aug, 2025

Cisco AICTE Virtual Internship

Key Skills: Network Security | Network Configuration | Risk Assessment | Cisco Packet Tracer

Successfully completed the Cisco AICTE Virtual Internship Program 2025 in Cybersecurity (June – August 2025) conducted by Cisco Networking Academy in collaboration with AICTE and Skill India.

During the internship, I gained practical exposure to core cybersecurity and networking concepts, including:

Fundamentals of Network Security and Cyber Threat Landscape

Secure Network Design Principles and Risk Mitigation

Understanding of Firewalls, Encryption, Authentication & Access Control

Basics of Ethical Hacking and Vulnerability Assessment

Cyber Hygiene Practices and Incident Response Awareness

Key Learning Outcomes:

Developed foundational knowledge of cybersecurity frameworks and protection mechanisms

Strengthened understanding of network protocols and security layers

Learned best practices for safeguarding digital infrastructure

Gained industry-oriented exposure aligned with current cybersecurity standards

This internship enhanced my technical understanding of cybersecurity principles and prepared me for future roles in network security and secure system design.

PROJECTS

Karshakan Setu

Mentor: Ms. Neha Hajare | Team Size: 4

Key Skills: ReactJS Firebase API Javascript

Project Link: <https://karshakan-setu-608d3.web.app/>

Karshakan Setu is an AI-powered web platform designed to provide intelligent, personalized farming guidance to Indian farmers. The system integrates user profile data, weather inputs, and activity logs to generate context-aware agricultural advisories through an AI assistant named “Sakhi.”

Key Features:

- ▢ Conversational AI Assistant (“Sakhi”) for real-time farming queries
- ▢ Activity Logging for tracking irrigation, spraying, fertilization, and crop cycles
- ▢ Weather-based advisory using OpenWeather API integration
- ▢ Profile-driven recommendations based on farm type, location, and crop details
- ▢ Secure authentication and data storage using Firebase (Auth + Firestore)
- ▢ Planned integration of AI reasoning models for advisory generation with confidence scoring

Tech Stack:

Frontend: React (Vite)

Backend/Database: Firebase (Authentication & Firestore)

APIs: OpenWeather API

AI Integration: Vertex AI (planned / modular integration design)

The project focuses on delivering real-time, actionable guidance instead of static information, aiming to enhance farmer decision-making through intelligent assistance.

DataPilot – AI-Powered Dataset Analysis & Insight Generation Platform

Mentor: Dr. Pramod D. Ganjewar | Team Size: 4

Key Skills: fastapi pandas SQLite ReactJS API Plotly Express

Project Link: <https://github.com/tusharkkp/MPR2>

DataPilot is an LLM-powered intelligent data analysis platform that allows users to upload datasets (CSV/Excel) and receive AI-generated insights, visualizations, and contextual explanations.

The system bridges the gap between raw data and actionable intelligence by combining statistical analysis, SQL validation, and large language models for interactive question-answering.

Key Features:

- ▢ Upload and analyze CSV/Excel datasets
- ▢ AI-driven insight generation using multiple LLM models

- ▣ Chat-based dataset Q&A with contextual memory
- ▣ Automated visualization generation (Plotly)
- ▣ “Show Thinking” option to display reasoning and generated SQL queries
- ▣ Auto-generated analytical summary reports
- ▣ Multi-dataset comparison and analysis (planned extension)

Technical Architecture:

1. Backend: Python FastAPI
2. Data Processing: Pandas
3. Database Engine: SQLite (in-memory SQL validation)
4. Visualization: Plotly Express
5. AI Integration: Multi-model LLM support (ChatGPT / Gemini-style APIs)
6. Frontend: React (Vite)

ACHIEVEMENTS

- Datathon Winner
- Nirmaan 2.0 1st Runner Up
- Google Cloud's Build and Grow Finalist
- Ideathon Finalist

ASSESSMENTS / CERTIFICATIONS

Python Essentials 1

Provider: Cisco Networking Academy

Key Skills: Python Pandas NumPy SciPy Matplotlib Problem Solving

POSITIONS OF RESPONSIBILITY

Technical Lead – ASSCET

Serving as the Tech Lead of ASSCET, I was responsible for leading technical planning and execution of department-level events, including CODEX 2026.

My responsibilities included:

- Leading the technical team for event execution and coordination
- Designing and managing technical infrastructure for events
- Overseeing development of digital assets, registrations, and technical workflows
- Guiding junior members in technical problem-solving
- Ensuring smooth execution of large-scale technical events

Played a key role in the successful organization and execution of CODEX 2026, contributing to strengthening the technical community within the department.

Technical Co-Lead of ASSCET's PromptWars

Led the technical planning and execution of **PromptWars 2025**, a department-level AI-focused competitive event organized under ASSCET and IEEE Student Branch.

Key Responsibilities:

- Designed the technical structure and competition workflow for multiple categories (UI/UX, Responsive Websites, Full-Stack Apps)
- Managed registration systems and digital infrastructure
- Coordinated AI tool guidelines and problem deployment mechanisms
- Supervised technical team operations during the 2-hour live challenge
- Ensured smooth execution of real-time problem unveiling and participant evaluation

Played a central role in delivering a structured, competitive, and technically engaging event for students across academic years.
